

## IN THE SPECIFICATION

Page 1, in the heading, please cancel "tesa...Description".

Page 1, before the first line of text, please insert:

--This is a 371 of PCT/EP2004/052971 filed 16 November 2004 (international filing date).--

Page 1, line 11, please insert:

--Background of the invention--

Paragraph beginning on page 2, line 27, please delete.

Page 2, line 29, please insert:

--Summary of the invention--

Page 3, line 12, please insert:

--Brief description of the drawing--

Paragraph beginning on page 3, line 13 (amended):

**Fig. 1** The drawing shows in diagrammatic representation a two-layer PSA of the invention, reference symbol 1 marking the first layer (layer (A)) and reference symbol 2 marking the second layer (layer (B)).

Page 3, line 16, please insert:

--Detailed description--

Paragraph beginning on page 3, line 21 (amended):

Layer A comprises a heat-activatable PSA which becomes tacky on exposure to ~~temperature~~ heat and optional pressure and which, after bonding and cooling, solidifies to develop a high bond strength. Depending on the application temperature, these heat-activatable PSAs have different static glass transition temperatures  $T_{g,a}$  or melting points  $T_{m,a}$ .
